EVAPORATIVE COOLING PAD PRODUCTION MACHINERY

Sharma Enterprises

NEW DELHI · EST. 2015

Sharma Enterprises specialises in the design and manufacturing of high-quality honeycomb (evaporative) cooling pad making machines. Founded in 2015 in New Delhi, India, the company has earned a reputation for reliability, precision engineering and customer satisfaction.

Our machines produce the cooling pads used in air coolers, greenhouses, poultry farms and industrial ventilation systems, and are supplied to small-scale startups and large manufacturing units across India and beyond.

We supply complete production lines in two models — 1100 (1100 mm kraft rolls) and 740 (740 mm kraft rolls) — producing 7090, 7060, 6090 and 5090 pad types from virgin or resin-coated kraft paper.
